

The Spine

Fundamental and Essential Patterns in FI

Advanced Training with Jeremy Krauss

April 18 – 21, 2013, Vienna

This Advanced Training will aim at:

* Knowledge on how to approach and understand common patterns of organization and disorganization of the spine in FI and ATM.

* Ability to work more clearly with people on the individual patterns of disorganization in the spine.

* A clearer understanding and applicable knowledge of these fundamental and essential patterns of organization.

"There are a number of common patterns of spinal organization that are important for normal development and function. I have noticed that practitioners many times have a certain amount of unclarity about these fundamental patterns and how to approach them. In this Advanced Training we will achieve clarifications through the use of specific ATMs I have created and through FI."

Jeremy Krauss

Thursday, April 18 – Sunday, April 21, 2013
